

11th SME SV Annual Conference

Transforming the Future IoT, 3D Printing & Robotics

Santa Clara Convention Center, Santa Clara, Ca
June 9, 2016

The SME Silicon Valley Chapter 98 has organized an exciting one-day annual conference featuring more than **20 speakers** who will speak about cutting-edge technology from **Intuitive Surgical, Varian Medical Systems, Neoto Robotics, Lawrence Livermore National Laboratory, Stanford University, and more!**

Key topics include:

- IoT in devices, infrastructure, and services
- Robotic trends in medical equipment and flexible manufacturing 3D bioprinting of blood vessels, additive metal process, and scalable additive systems
- The future of autonomous systems, from driverless cars to space robots
- On-site demonstrations: robotics, laser, and 3D printing
- Career development and job fair (starting at 4:15 pm)

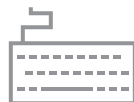

Register for special student discounts (**full time college students only**).
Prices will continue to go up so register early!

Conference ticket includes a light breakfast, lunch and reception.
